### WARRANTY

Pack Size	1.77m <sup>2</sup>
Pieces per pack	2 full lengths at 2.295m Up to 1 split length that totals 2.295m may occur in every fifth box
Pack Weight	22kg
Pack Dimensions	W 314mm x L 2956mm x H 44mm

### RECOMMENDED CARE AND MAINTENANCE

Regular Cleaner	Moda Cleaner/Concentrate
Maintenance Cleaner	Moda Protective Wax
To Refresh Finish	Moda SilkMatte Refresher
Stain Remover	Moda Heavy Duty Spot Cleaner
For Minor Repairs	Moda Wax Filler & Moda Stain
For Comprehensive Repairs	Moda Professional Repair Kit

## TECHNICAL SPECIFICATIONS

Reaction to Fire (Floors)	Critical Flux 4.32kw/m <sup>2</sup>
Reaction to Fire (Walls & Ceilings)	Group 3 / Class Dfl-s1 / (Group 1 can be achieved with intumescent coating)
Thermal Resistance	0.118m <sup>2</sup> K/W
Thermal Conductivity	0.161 W/(m.K)
Resistance to Chemicals	Class 5 (except blue ink)
Formaldehyde Emission	E1 / No Added Formaldehyde
Wear Layer Density	650kg/m <sup>3</sup>
<b>Slip Ratings</b>	
AS/NZS 4586 Dry Test	0.75 COF – Classification F (Moderate to very low)
AS/NZS 4586 Wet Test	48 SRV – Classification W (Low)

## MODA WIDE PLANK – FEATURE GRADE

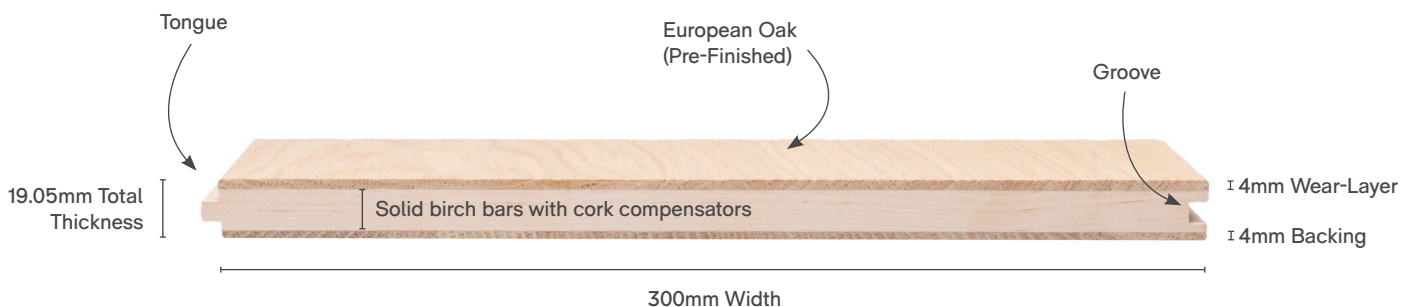

A feature grade plank consists of more frequent and larger natural character within the plank. Frequent knots and feature achieves a more rustic and natural look. The planks may have substantial colour and grade variation.

A feature plank may contain unlimited sound sapwood, small burls, light brown streaks, restored knots, properly filled open cracks and worm holes, imperfections in face work (torn grain) may also be present.

Colour Variation	No Limit
Sapwood	No Limit
Knots	No Limit (After filling)
Checks	Permitted filled up to 30mm in width
Bark Pocket	No Limit (After filling)
Pith	Permitted
Slope of grain and medullary rays	Permitted

# Plank Profile

## MODA WIDE PLANK

The Forest Stewardship Council (FSC®) is a global not-for profit organisation that sets the standards for what a responsibly managed forest is, both environmentally and socially. It is recognised as an international organisation that provides a system for different stakeholders interested in forest issues to work towards responsible forest management.

In providing this system, FSC® promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests.

**Environmentally appropriate:**

Forest management ensures that the harvest of timber and non-timber products maintains the forest's biodiversity, productivity and ecological processes.

**Socially beneficial:**

Forest management helps both local people and society at large to enjoy long term benefits and also provides strong incentives to local people to sustain the forest resources and adhere to long-term management plans.

**Economically viable:**

Forest management means that forest operations are structured and managed so as to be sufficiently profitable, without generating financial profit at the expense of the forest resources, the ecosystem or affected communities. The tension between the need to generate adequate financial returns and the principles of responsible forest operations can be reduced through efforts to market forest products for their best value.

FSC® certified forests have to meet rigorous standards to ensure they are healthy and benefit local communities.

**The Moda Collection successfully received:**

**Supply Chain Certification - Chain of Custody (COC) Certification:** This certification assures that products with an FSC® claim has originated from well-managed forests or controlled sources and comply with all required standards throughout the process (from the forest to the shelf).

# Care and Maintenance
